Bioterrorism Preparedness and Response Project Profile WYOMING

Updated: March 20, 2001

Source: Centers for Disease Control and Prevention/Bioterrorism Preparedness and Response Program			
Focus Areas	Epidemiology and Surveillance - Core		
Funded	Laboratory Capacity for Biologic Agents		
	Health Alert Network		
Wyoming has strengthened its capacity to respond to threats of bioterrorism by:	 Health Alert Network Establishing teams to address organization and maintenance of a command post and emergency operations center and laboratory requirements for identifying BT agents Conducting a meeting on Animal Disease Surveillance and Bioterrorism in collaboration with Wyoming Game & Fish, Wyoming State Veterinary Lab, Wyoming Livestock Board and USDA Establishing a contract with the regional Poison Control Center for daily reports of calls made to the Center by Wyoming citizens Completing renovations of a BSL-3 laboratory Accessing hands-on training with select bioterrorism agents for the BT microbiologist via the USDA lab, the Wyoming State Vet Lab and the Wyoming Game & Fish lab Conducting statewide survey of hospital laboratories to assess training needs Operationalizing an All Hazards Response 24/7 toll free phone number for reporting of food- or waterborne disease outbreaks, hazardous material spills, radiological exposures, biological or chemical incidents/accidents, and diseases on the Reportable Disease List Activating an All Hazards Response website Performing scheduled and unscheduled tests of communication and alert systems Implementing computerized broadcast "blast" fax capability Developing Epi maps to show geographical distribution of infectious disease morbidity in Wyoming, the maps are posted 		
	on the Internet at: http://wdhfs.state.wy.us/epiid/epimaps.htm		
Project Year 2	Conducting 2 bioterrorism table-top exercises		
Plans (August 31, 2000-August 30, 2001) include:	 Educating response partners such as nurses, first responders and veterinarians 		
2001) Illolado.	 Increasing laboratory testing capability for biologic agents Providing laboratory, communications and epidemiology training to local and state public health professionals 		
	 Completing Wide Area Network inter-connectivity Increasing collaboration among local, state, and federal 		

- personnel who have a role in bioterrorism preparedness
- Developing a training/orientation video for animal health professionals
- Revising the Reportable Disease List to include high priority agents of concern for bioterrorism
- Improving timeliness and frequency of reporting by physicians and laboratorians
- Installing radio and telecommunications systems to improve communications among state and county agencies and ensure backup communications capacity
- Developing a statewide computer-based 24/7 active alert system and a local area infrastructure to support data exchange
- Developing an emergency/disaster response team with expertise in engineering, medicine, environmental issues, and safety
- Completing the Bioterrorism Appendix to the All Hazards Response Plan
